Venue: Learning Galaxy, 8th floor, Urmi estate, Lower Parel

In Association With

Save the Date

MUMBAI

**4th June
Mumbai**

Dear Colleagues,

Pediatric Hematology as a science is a fascinating amalgamation of clinical cues and laboratory expertise. The advances in latter should not make us forget the basic clinical practices. Keeping that in mind; the Department of Pediatric hematology & oncology at B. J. Wadia hospital for children in association with The Mumbai IAP is coming up with an interesting lecture series along with interactive workshops to make Pediatric hematology learning as fun as it can be. These will take you through clinical approach, appropriate diagnostic modalities and treatment of common hematological conditions attended by paediatricians across.

This will not only update you with the latest guidelines in Pediatric hematology but will also help brush up your clinical skills.

Hoping to see you all for the NTPPH (National Training Program - Practical Paediatric Hematology) on 4th of June in Mumbai!

Grab your seats now.
